Date/Time 9-16-03 /2 00

Site Contact(s) Phone Annette Primrose and Gary J. Carnival
(303) 966-4385 (303) 966-2258

Regulatory Contact: Phone Carl Spreng
(303) 692-3358

Agency CDPHE

Purpose of Contact: OPWL Sample location near Pond B-2

Discussion

There are two Original Process Waste Line (OPWL) sampling locations listed in the SAP Addendum for IHSS Group 000-2 (IA-03-11), one of which is on top of the dam and the other is within the rip rap cover of the east face of B-1 dam and near the water level of the B-2 pond. The two locations are CV46-000 (top of the dam) and CW46-000 (on the east face of the dam). Recent discussions with the Site utility personnel determined that this segment of the line was an over ground line that ran along the hillside north of the ponds and dam and discharged at the north side of the B-2 pond. The discharge location of this line is believed to correlate with the location of the nearby B-1 Pond hot spot.

Project personnel will walk down the area with Site utility personnel to determine, as accurately as possible, where the pipeline was located and discharged. The sample locations will be chosen, one at the 45 degree pipe connection north of the top of the dam and the other at least one foot downgradient of the open end of the pipe in the approximate area of discharge. Because this was a surface pipeline, the sample intervals 0-6 inches and 6 inches to 2.5 feet will be collected for both of these locations.
